

Product Name	Cat. No.	Pack Size
pBBL-AP1- Luciferase	# BB-V0055	50 µg

Description: pBBL-AP1-Luciferase plasmid express luciferase in mammalian cell driven by the AP1 (Activator protein 1) transcription factors. The plasmid is amplified in *E.coli*.

The sequence of the binding site is ACGTTGACTCAGTCTGACTCATGCTGACTCAACGT which is cloned at SalI-BamHI site.

Ampicilin is selective marker.

Storage:-20°C
