

pBBL-kBLuc
Cat#BB-V0035 (10µg)

Description: pBBL-kBLuc plasmid expresses luciferase in mammalian cell driven by the NF- κ B family of dimeric transcription factors. The plasmid is ampicillin resistant and amplified in *E. coli*. The sequence of the binding site is GGGACTTTCC GCTG GGGACTTTCC which is cloned at SalI-BamHI site.
