

RNase Inhibitor**Cat # BB-X0010 (2000 U)**

Description: RNase inhibitor inhibits the activity of RNase A, B and C by noncovalently binding them in 1:1 ratio. It does not inhibit other eukaryotic RNases or the prokaryotic RNases I and H. This murine RNase Inhibitor is purified as a recombinant protein expressed in *E. coli*.

Reagents supplied: RNase Inhibitor, (20U/μl)

Storage Buffer: 20 mM Tris pH 7.5, 200 mM NaCl, 0.1 mM EDTA, 10 mM DTT, 50% Glycerol

Storage: -20°C
